PREAMBLE

The ongoing B.Sc. (H) Zoology course was introduced by the Faculty of Sciences from the academic year 2005-2006. The new course that will be effective from the academic year 2010-2011, will follow the Semester mode. It has been prepared keeping in view the unique requirements of B.Sc. (H) Zoology students.

The contents have been drawn-up to accommodate the widening horizons of the discipline of Biological Sciences. They reflect the current changing needs of the students; specifically, the subjects on Mathematics and Statistics and Computation skills have been included. A special feature of this program has been the introduction of six new papers on Cell & Molecular Biology and Genetics that cover major disciplines in newer areas of Biological Sciences where a tremendous progress has been made during the past decade. A new paper on Biotechnology will also provide a glimpse of the application aspect. While the endeavor is to provide the student with the latest, nevertheless the classical zoology has been given due weightage.

The course content also lists the new practical exercises so that the students get a hands-on experience of the latest techniques that are in current usage.
